

SAVEETHA SCHOOL OF ENGINEERING
CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS
LIST OF EXPERIMENT 5

5. Create a simple cloud software application for Library book reservation system for SIMATS library using any Cloud Service Provider to demonstrate SaaS.

Aim

To develop a cloud-based **Library Book Reservation System** for the **SIMATS Library** using **Zoho Creator** and deploy it as a **Software as a Service (SaaS)** application, enabling students and staff to search, reserve, and manage library books online.

Procedure

1. Log in to **Zoho Creator** using a valid Zoho account.
2. Create a new application named **SIMATS Library Book Reservation System**.
3. Design forms such as:
 - Student Details
 - Book Details
 - Book Reservation
4. Add required fields including Student ID, Student Name, Department, Email, Book ID, Book Title, Author, ISBN, Reservation Date, Due Date, and Reservation Status.
5. Create reports to display available books, reserved books, overdue books, and student reservation history.
6. Configure workflows for book reservation confirmation, availability validation, and return reminders.
7. Assign user roles and permissions for librarians and students.
8. Publish and deploy the application on the **Zoho Creator** cloud platform.
9. Test the application by adding books, reserving books, updating reservation status, and viewing reports through a web browser.

Result

A cloud-based **Library Book Reservation System** for the **SIMATS Library** was successfully developed and deployed using **Zoho Creator**. The application enabled students and librarians to manage book reservations efficiently through a web browser, demonstrating the **Software as a Service (SaaS)** model by providing secure, online access without requiring local software installation.
