

SAVEETHA SCHOOL OF ENGINEERING
CSA15- CLOUD COMPUTING AND BIG DATA ANALYTICS

LIST OF EXPERIMENTS 4

4. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS.

Aim

To develop a cloud-based **Car Booking Reservation System** using **Zoho Creator** and deploy it as a **Software as a Service (SaaS)** application, enabling users to reserve, manage, and track car bookings online.

Procedure

1. Log in to **Zoho Creator** using a valid Zoho account.
2. Create a new application named **Car Booking Reservation System**.
3. Design forms such as:
 - Customer Details
 - Car Details
 - Car Booking
4. Add required fields including Customer Name, Contact Number, Email, Car Model, Registration Number, Pickup Location, Drop-off Location, Booking Date, Return Date, Rental Cost, and Booking Status.
5. Create reports to display available cars, booking history, and customer information.
6. Configure workflows for booking confirmation, availability checking, and input validation.
7. Assign user roles and permissions for administrators and customers.
8. Publish and deploy the application on the **Zoho Creator** cloud platform.
9. Test the application by adding cars, making reservations, updating booking details, and viewing reports through a web browser.

Snapshots:

Car ID	Model	Brand	Fuel Type	Seating Capacity	Rent Per Day	Availability Status
5	Corolla	Toyota	Hybrid	5	\$ 480.00	Under Maintenance
4	Mustang	Ford	Diesel	4	\$ 600.00	Booked
3	Accord	Honda	Hybrid	5	\$ 520.00	Under Maintenance
2	Civic	Honda	Petrol	4	\$ 450.00	Available
1	Camry	Toyota	Petrol	5	\$ 500.00	Booked
9	718 boxster	porsche	Petrol	2	\$ 5,000.00	Available
8	cayenne	porsche	Electric	5	\$ 5,000.00	Available
7	santro	hyundai	Petrol	6	\$ 5,000.00	Under Maintenance
6	camry	toyota	Petrol	4	\$ 3,000.00	Available

Result

A cloud-based **Car Booking Reservation System** was successfully developed and deployed using **Zoho Creator**. The application enabled users to reserve and manage car bookings online through a web browser, demonstrating the **Software as a Service (SaaS)** model by providing secure, anytime, anywhere access without requiring local software installation
